Abstract	(v)
Acknowledgements	(vii)
Contents	(viii)
List of Tables	(xi)
List of Figures	(xii)
Chapter	
1. Introduction	1
1.1 Background	1
1.2 Rationale	10
1.3 Objectives	10
1.4 Definition of terms	10
2. Methodology	13
2.1 Demographic Trends Affecting education Completion in Pattani and Songkhla Provinces	13
2.1.1 Demographic factors on education completion	13
2.1.1.1 Variables and methodology	13
2.1.1.2 Statistical method	14
2.1.1.2.1 Univariate Analysis	14
2.1.1.2.2 2 x 2 table	14
2.1.1.2.3 Non-stratified $r \times c$ tables	15
2.1.1.2.4 Logistic Regression	17
2.1.2 Trends in secondary education completion	19

2.1.2.1	Variables and methodology	19
2.1.2.2	Statistical methods	21
2.2	Demographic Factors Affecting Employment in Pattani and Songkhla Provinces of Thailand	23
2.2.1	Variables and methodology	23
2.2.2	Statistical methods	25
3.	Result	28
3.1	Demographic Trends Affecting Education Completion in Pattani and Songkhla Provinces	28
3.1.1	Demographic factors in education completion.	28
3.1.1.1	Preliminary analysis	28
3.1.1.2	Logistic regression modeling analysis	35
3.1.2	Trends in secondary education completion.	37
3.1.2.1	Preliminary analysis	37
3.1.2.2	Logistic regression model	40
3.2	Demographic factors affecting employment in Pattani and Songkhla Provinces of Thailand	44
3.2.1	Preliminary analysis	44
3.2.2	Logistic regression model	46
4.	Conclusion and discussion	52
4.1	Conclusion	52
4.2	Discussion	54
4.3	Recommendations for application and further research	60
4.3.1	Research application	60

4.3.2 Further study	61
4.4 Limitation of study	61

List of Tables

Tables	Page
1.1: The distribution of employed persons by level of education from 1996 to 2000	6
1.2: Employment rate by age and occupational group in Pattani and Songkhla Province	8
3.1: Cross tabulation of percentages at each education completion level, by age group for Pattani (PN) and Songkhla (SK) Provinces	29
3.2: Shows observed percentages for Education Completion at each level by Age Group in Pattani (PN) and Songkhla (SK)	30
3.3: Shows observed percentage for Education Completion at each level by gender and religion in Pattani (PN) and Songkhla (SK)	32
3.4: The results from fitting logistic regression model in Pattani	35
3.5: The results from fitting logistic regression model in Songkhla	36
3.6: Logistic model results of Pattani	40
3.7: Logistic model results of Songkhla	41
3.8: Shows crude results of employment status percentages, by education level, gender and religion, for combined districts and combined age groups	44
3.9: ANOVA table for Pattani (PN) and Songkhla (SK) Provinces	45
3.10: Coefficient value and average coefficient value according to areas and demographic factors for Pattani Province	47
3.11: Coefficient value and average coefficient value according to areas and demographic factors for Songkhla Province	48
3.12: The unemployment rate at different education levels, in comparison to the group 'elementary education completed', in Pattani and Songkhla Provinces	49

List of Figures

Figures	Page
1.1: Organization of the present school system in Thailand	2
1.2: Population Pyramid of Thailand : 1990 and 2002	4
1.3: Location of Pattani Province in Southern Thailand	7
1.4: Figure for world unemployment rates, 2006	9
2.1: Path diagram of variables considered in study	20
2.2: Districts in Songkhla and Pattani Provinces with study regions defined by aggregation	21
2.3: Path diagram of variables considered in study	25
3.1: Odds ratios for Education Completion at each level by age group in Pattani and Songkhla	31
3.2: Odds ratios for Education Completion at each level by gender and religion groups in Pattani and Songkhla	33
3.3: Odds ratios for Education Completion at each level, by districts in Pattani and in Songkhla	34
3.4: Secondary school completion rates versus age by district, gender and religion in Pattani	38
3.5: Secondary school completion rates versus age by district, gender and religion in Songkhla	39
3.6: Secondary school completion rates versus age by district, gender and religion in Pattani based on the logistic model	42
3.7: Secondary school completion rates versus age by district, gender and religion in Songkhla based on the logistic model	43

3.8: Odds ratios plot in order to compare the unemployment rate of the populations with secondary education and elementary education between Pattani and Songkhla, according to demographic factors
