The factors affecting collagen properties

Gelatin

Conversion of collagen to gelatin

Production of gelatin

Composition of gelatin

Gelatin structure

Isoelectric point of gelatin

The Mechanism of gelation

Factors affecting the properties of gelatin gels

Production and characterization of fish gelatins

Use of collagen and gelatin

Objectives

2. Material and methods

1. Chemical reagents

2. Fish skin and bone preparation
3. Instruments

4. Preparation and characterization of acid soluble collagens of collagen from skin and bone

4.1 Extraction of collagen

4.2 Characterization of collagen

5. Extraction and characterization of gelatin from skin and bone of bigeye snapper

5.1 Deproteinization process for gelatin extraction from skin and bone

5.2 Demineralization process for gelatin extraction from bone

5.3 Swelling process for gelatin extraction from skin and bone

5.4 Extraction of gelatin from pretreated skin and bone

6. Characterization and functional properties of gelatin of skin from bigeye snapper

1.1 Compositions of skin, bone and their collagens

1.2 Amino acid composition of skin and bone collagens

1.3 SDS-polyacrylamide gel electrophoresis patterns of skin and bone collagens

1.4 Peptide mapping of skin and bone collagens

1.5 Thermal stability of skin and bone collagens

1.6 Viscosity of skin and bone collagen solutions

1.7 Solubility of skin and bone collagens

2. Extraction of gelatin from skin and bone from bigeye snapper

2.1 Deproteinization for gelatin extraction

2.2 Demineralization for gelatin extraction from bone

2.3 Swelling for gelatin extraction from skin and bone

3. Characterization and functionality of gelatin from skin of bigeye snapper

3.1 Proximate compositions of bigeye snapper skin and its gelatin
3.2 SDS-polyacrylamide gel electrophoretic (SDS-PAGE) patterns of skin gelatin

3.3 Gelation of gelatin from bigeye snapper skin

3.4 Solubility of gelatin

3.5 Emulsifying properties

3.6 Foaming properties

4. Improvement of gel properties of gelatin from skin of bigeye snapper

4.1 Turbidity of gelatin solution and color of gelatin gels

4.2 Bloom strength of skin gelatin gels

4.3 Color of gelatin gel
4.4  SDS-polyacrylamide gel electrophoretic (SDS-PAGE) patterns of gelatin gels 100

4.5  Scanning Electron Microscopy of Gelatin gels 102

4. Conclusion 110
