CHAPTER	
1. INTRODUCTION	1
Background	1
Objectives	4
Research questions	4
Conceptual/theoretical framework	5
Definitions of terms	7
Significance of the study	8
2. LITERATURE REVIEW	9
Mastectomy and its impacts	9
Self-care based on self-care deficit nursing theory	14
Self-care among women who have undergone mastectomy	19
Factors related to self-care among women who have undergone mastectomy	33
Health state	33
Health care system	34

CONTENTS (Continued)

	Page
Information resources	37
3. METHODOLOGY	45
Research design	45
Population, sample, and setting	45
Instruments	47
Validity and reliability of instruments	50
Ethical considerations	52
Data collection procedures	52
Data analysis	54
4. RESULTS AND DISCUSSION	55
Results	56
Demographic characteristics	56
Levels of health states	60
Types of health care system	61
Levels of adequacy and types of received information resources	61
Self-care of postmastectomy women	63
Relationships between health state, types of health care systems, adequacy of received information resources, and self-care	65
Discussion	68
Demographic characteristics	68
Levels of health states	71

CONTENTS (Continued)

	Page
Types of health care systems	72
Levels of adequacy and types of received information resources	73
Self-care of postmastectomy women	77
Relationships between health state, types of health care system, adequacy of received information resources, and self-care	84
5. CONCLUSION AND RECOMMENDATION	87
Conclusions	87
Implications and recommendations	89
Limitations of the study	91
BIBLIOGRAPHY	92
APPENDICES	105
Appendix A: Consent Form	106
Appendix B: Instruments	108
Appendix C: Reliability of SCQ and IRQ	116
Appendix D: Frequency and percentage of characteristics of health state assessed by professional	116
Appendix E: Frequency and percentage of the levels of health states perceived by patient and assessed by professional	117
Appendix F: Mean and standard deviation of self-care of postmastectomy women	117
Appendix G: Frequency, percentage, mean and standard deviation	119

CONTENTS (Continued)

	Page
regarding levels of self-care of postmastectomy women	
Appendix H: Frequency and percentage regarding each activity of self-care of postmastectomy women	119
Appendix I: Pearson's product moment correlation coefficients (statistical significance) between health state perceived by patient and health state assessed by professional	121
VITAE	122

TABLES

Table		Page
1	The characteristics of subjects	56
2	Frequency and percentage of subjects of health and illness history	59
3	Mean, standard deviation, and level of health state	60
4	Frequency and percentage of subjects who used several types of health care systems in general and after mastectomy	61
5	Mean and standard deviation of the adequacy of information resources of each item	62
6	Frequency and percentage of types of information resources sought, received and ranked by subjects	64
7	Mean and standard deviation of self-care scores in postmastectomy women	65
8	Pearson's product moment correlation coefficients between (statistical significance) health state perceived by patient, health state assessed by professional, types of health care systems, and adequacy of received information resources, and self-care	67

FIGURES
