

LIST OF TABLES

TABLE		PAGE
1	Within run precision for quinine from three replicated standard curves of PART1 in water.	10
2	Between run precision for quinine from three replicated standard curves of PART1 in water.	10
3	Within run precision for quinine from three replicated standard curves of PART1 in normal saline solution	11
4	Between run precision for quinine from three replicated standard curves PART1 in normal saline solution.	11
5	Within run precision for quinine from three replicated standard curves of PART2 in water.	12
6	Between run precision for quinine from three replicated standard curves of PART2 in water.	12
7	Within run precision for quinine from three replicated standard curves of PART2 in normal saline solution.	13
8	Between run precision for quinine from three replicated standard curves of PART2 in normal saline solution.	13
9	Quinine concentration remaining at various times.	16
10	Percent of initial quinine concentration remaining at various times.	17
11	Statistical differences of percent of quinine that remaining at 24 hr assessed by oneway analysis of variance and LSD. (at 1.2 mg/ml of quinine)	18
12	Statistical differences of percent of quinine that remaining at 24 hr assessed by oneway analysis of variance and LSD. (at 3.6 mg/ml of quinine)	19
