Abstract	(3)
Acknowledgement	(5)
Contents	(6)
List of Tables	(9)
List of Figures	(13)
Chapter	
1. Introduction	1
1.1 Background	1
1.2 Research Objectives	2
2. Literature Reviews	3
2.1 Rubberwood	3
2.2 The Theory and Practice of Wood Drying	8
2.2.1 Problems in Drying Wood	8
2.2.2 Water and Wood	11
2.2.3 Drying Concepts	15
2.2.4 Factors Influencing the Drying of Wood	17
2.2.4.1 Vopour Pressure and Relative Humidity	17
2.2.4.2 Temperature	18
2.2.4.3 Air Movement	19
2.2.4.4 Movement of Moisture in the Wood	20
2.3 Drying Method	20
2.3.1 Air Drying or Seasoning	20
2.3.2 Kiln Drying	21
2.3.2.1 Pre-dryers	21
2.3.2.2 Dehumidification dry kiln	21
2.3.2.3 Solar drying kiln	22
2.3.2.4 Steam kiln drying	24
2.3.2.5 Vacuum drying	24
	(6)

Contents (Continued)

	Page
2.3.2.6 High-temperature dry kilns	25
2.4 Superheated Steam Drying	25
2.4.1 Definition of Superheated Steam	25
2.4.2 Benefits of Using Superheated Steam	26
2.4.3 Properties of Superheated Steam Drying	26
2.4.4 Previous Researches	28
3. Experiment and Method	30
3.1 Wood samples	30
3.2 Equipment	31
3.3 Method	32
3.3.1 Design and construction of the superheated steam drying vessel	32
3.3.2 Determination of the drying rates of superheated steam and hot air drying	33
3.3.3 Determination of the physical and mechanical properties	35
3.3.4 Comparison of the physical and mechanical properties of wood	36
4. Results and Discussion	37
4.1 Drying Rates	37
4.2 Temperature Profile	41
4.3 Physical and Mechanical Properties	43
4.3.1 Physical Properties	43
4.3.2 Mechanical Properties	47
4.4 Time Savings Potential	55
5. Conclusions and Recommendations	56
Conclusions	56
Recommendations	57

Bibliography	58
Appendix	
A-Tests of Mechanical Properties of Wood	61
B-Raw Data of Drying Experiment	74
C-Raw Data of Physical and Mechanical Properties Test	91
D-Kiln Drying Schedule-Rubberwood Species	101
E-Equipment	102
F-Comparison of Mechanical Properties of Wood by Using Program	
SPSS for Windows	108
Vitae	110
