Abstract	iii
Acknowledgements	vii
Contents	viii
List of Tables	xi
List of Figures	xii
<b>Chapter</b>	
<b>1. Introduction</b>	<b>1</b>
1.1 Rationale for study	1
1.2 Literature review	5
<i>Logistic regression</i>	5
<i>Poisson regression</i>	8
<i>Negative binomial regression</i>	8
<i>Zero-inflated count models</i>	10
<i>Log-transformed linear model</i>	10
<i>Generalized estimating equations</i>	12
<i>Canonical correspondence analysis</i>	12
<i>Multivariate multiple linear regression</i>	14
1.3 The studies	14
1.4 Objectives and plan of thesis	16

<b>2. Methodology</b>	<b>18</b>
2.1 Generalized linear models	18
<i>Poisson regression model</i>	20
<i>Adjusted incidence rates</i>	20
<i>Overdispersion</i>	20
<i>Negative binomial regression model</i>	21
2.2 Log-transformed linear regression model	21
<i>Handling zeroes</i>	22
<i>Sum contrasts</i>	23
<i>Methods for creating geographical maps</i>	23
2.3 Multivariate multiple regression model	24
2.4 Canonical correspondence analysis	25
2.5 Factor analysis	26
2.6 Model assumptions	28
<i>Data transformation</i>	28
<i>Graphical Normality</i>	29
<i>Homoskedasticity</i>	29
<b>3. Modeling overdispersed response data</b>	<b>30</b>
3.1 Data source and data management	30
3.2 Studies completed	32
3.3 Preliminary analyses	33
3.4 Published article and manuscripts written as part of the thesis	38

<i>Method for modeling incidence rates with application to</i>	
<i>Pneumonia among children in Surat Thani, Thailand</i>	39
<i>Modeling the incidence of tuberculosis in the southern</i>	
<i>provinces of Thailand</i>	49
<i>Regression-Based modeling of macrobenthic fauna density</i>	
<i>in the middle Songkhla Lake, Thailand</i>	60
<b>4. Summary and Conclusions</b>	<b>78</b>
4.1 Pneumonia among children in Surat Thani province	78
4.2 Tuberculosis in southern Thailand	82
4.3 Densities of macrobenthic fauna families in middle Songkhla Lake	83
4.4 Suggestions for further study	84
<b>References</b>	<b>86</b>
<b>Vitae</b>	<b>93</b>

## List of Tables

Table	Page
Table 3.1: TB incidence per 100,000 among age group and gender	35
Table 3.2: TB incidence per 100,000 in each province in the southern region of Thailand	35
Table 3.3: Descriptive statistics for 13 environmental variables	36
Table 3.4: Pearson correlation coefficient of environmental variables	37
Table 3.5: Descriptive statistics for 24 Macrobenthic families density (ind m <sup>-2</sup> )	38

## List of Figures

Figure	Page
Figure 1.1: Path diagrams for variables used in two epidemiological studies	16
Figure 1.2: Path diagrams for variables used in ecological studies	17
Figure 3.1: Flow diagram for data management	31
Figure 3.2: The total annual incidence rates in gender age group and time	34
Figure 3.3: Map of Surat Thani showing incidence rates in Surat Thani province	34
Figure 4.1: Deviance residuals from Poisson regression generalized linear model	79
