1960	1	2	7.971014500
1964	1	2	8.088234901
...
2000	2	1	6.887645245

Data Jumping

year	sex	event	distance
1928	1	1	1.94
1932	1	1	1.97
1936	1	1	2.03
1948	1	1	1.98
1952	1	1	2.04
1956	1	1	2.12
1960	1	1	2.16
1964	1	1	2.18
1968	1	1	2.24
1972	1	1	2.23
1976	1	1	2.25
1980	1	1	2.36
1984	1	1	2.35
1988	1	1	2.38
1992	1	1	2.34
1996	1	1	2.39
2000	1	1	2.35
1928	1	2	7.73
1932	1	2	7.64
1936	1	2	8.06
1948	1	2	7.82
1952	1	2	7.57
1956	1	2	7.83
1928	1	2	7.73
1932	1	2	7.64
1936	1	2	8.06
...
2000	2	6	15.2

Data Throwing

year	sex	event	distance
1928	1	1	15.87
1932	1	1	16.00
1936	1	1	16.20
1948	1	1	17.12
1952	1	1	17.41
1956	1	1	18.57
1960	1	1	19.68
1964	1	1	20.33
1968	1	1	20.54
1972	1	1	21.18
1976	1	1	21.05
1980	1	1	21.25
1984	1	1	21.26
1988	1	1	22.47
1992	1	1	21.70
1996	1	1	21.62
2000	1	1	21.29
1928	1	2	47.32
1932	1	2	49.49
1936	1	2	50.48
1948	1	2	52.78
1952	1	2	55.03
1956	1	2	56.36
1960	1	2	59.18
1964	1	2	61.00
1968	1	2	64.78
...
2000	2	3	68.91

B: Programming

MATLAB version 5 and Asp (McNeil, 1998) is compiled by MATLAB. This a suit of functions for graphing and analysis data. These programs are used with MATLAB, that is a software package, which runs under Microsoft Windows. The m-file programs for producing the results was fitted model to show adjust r-squares and coefficient.

```
% Program swimmen.m create Figure 4.1
```

```
getfile swimmen
```

```
setvar y=1 x=[2 5]
```

```
adjust ncat=18 font=8
```

```
adjust ncat=18 show=2
```

```
% Program swimm.m create Figure 4.2
```

```
getfile swimm
```

```
y = getnum;
```

```
y(:,1) = log(y(:,1))/log(10);
```

```
putnum(y)
```

```
fn = getfn;
```

```
fn{1} = 'log10(speed)';
```

```
putfn(fn)
```

```
setvar y=1 x=[2 5]
```

```
adjust ncat=18 font=8
```

```
adjust ncat=18 show=2
```

```
% Program swimw.m create Figure 4.3
```

```
getfile swimw
```

```
y = getnum;
```

```
y(:,1) = log(y(:,1))/log(10);
```

```
putnum(y)
```

```
fn = getfn;
```

```
fn{1} = 'log10(speed)';
```

```
putfn(fn)
```

```
setvar y=1 x=[2 5]
```

```
adjust ncat=18 font=8
```

```
adjust ncat=18 show=2
```

```
% Program runm.m create Figure 4.4
getfile runm
y = getnum;
y(:,1) = log(y(:,1))/log(10);
putnum(y)
fn = getfn;
fn{1} = 'log10(speed)';
putfn(fn)
setvar y=1 x=[2 3]
adjust ncat=18 font=8
adjust ncat=18 show=2

% Program runw.m create Figure 4.5
getfile runw
y = getnum;
y(:,1) = log(y(:,1))/log(10);
putnum(y)
fn = getfn;
fn{1} = 'log10(speed)';
putfn(fn)
setvar y=1 x=[2 3]
adjust ncat=18 font=8
adjust ncat=18 show=2

% Program jump.m create Figure 4.6
getfile jump
setvar y=1 x=[3 2]
adjust ncat=18 font=8
adjust ncat=18 show=2

% Program throw.m create Figure 4.7
getfile swimmen
setvar y=1 x=[2 5]
adjust ncat=18 font=8
adjust ncat=18 show=2
```
