Abstract	(4)
Acknowledgments	(5)
Contents	(6)
List of Tables	(8)
List of Figures	(9)
Chapter	
1 Introduction	
1.1 The Olympics	1
1.2 Review of Literature	3
1.3 Scope of Investigation and Research Objectives	4
2 Methods	
2.1 Study Design	5
2.2 Conceptual Framework	6
2.3 Statistical Method	7
3 Preliminary Data Analysis	10
3.1 Description of Data	11
3.2 Characteristics of Determinants	12
3.3 Description of Swimming Data	13
3.4 Description of Running Data	18
3.5 Description of Jumping Data	23
3.6 Description of Throwing Data	27
3.7 Summary	31
4 Regression Analysis	
4.1 Swimming Performances	32
4.2 Running Performances	37
4.3 Jumping and Throwing Performances	39
4.4 Linear Regression Model	42
4.5 Overall Trends	44

Page

5 Conclusions

5.1 Conclusions 45

5.2 Discussion 47

5.3 Limitations 47

References 48

Appendix 50

A. Data 51

B. Programming 53

Vitae 55

List of Tables

Tables		Page
3.1	The styles of four sports for sex	12
5.1	The improvement in Olympic performances	46

List of Figures

Figures		Page
2.1	Conceptual framework	6
3.1	Structure of database	10
3.2	Numerical summaries of swimming data with histograms of speeds (left) and years (right)	13
3.3	Box plots of swimming speeds by distance for men and women	14
3.4	Box plots of swimming speed by years for men and women	14
3.5	Box plots of swimming speed by type of event for men and women	14
3.6	Box plots of swimming speed by year for men's and women's freestyle	15
3.7	Box plots of swimming speed by freestyle events for men and women	15
3.8	Box plots of event-adjusted swimming speeds by year for men and women	16
3.9	95 % Confidence intervals of event-adjusted speeds by year for men and women	16
3.10	Box plots of swimming speed by events men and women adjusted for year	17
3.11	Means & 95% confidence intervals of event speeds adjusted for year	18
3.12	Numerical summaries of running data with histograms of speeds (left) and years (right)	19
3.13	Box plots of running speeds by type of event for men and women	19
3.14	Box plots of running speed by year for men and women	20
3.15	Box plots of running speeds by event for men and women	20
3.16	Box plots of running speed by year for men and women adjusted for events	21
3.17	Means & 95% confidence intervals adjusted for events	22
3.18	Box plots of running speed by events for men and women adjusted for year	22
3.19	Means & 95% confidence intervals adjusted for year	23
3.20	Numerical summaries of jumping data with histograms of distance (+ log-transformed)	23
3.21	Box plots of jumping distance by events for men and women	24
3.22	Box plots of jumping log distance by events for men and women	24
3.23	Box plots of jumping log distance by year adjusted for six events	25
3.24	Means & 95% confidence intervals of log-distance adjusted for year	26
3.25	Box plots of jumping log-distance by event adjusted for year	26

Figures		Page
3.26	Means & 95% confidence intervals	27
3.27	Numerical summaries of throwing data, with log-transformed distance	27
3.28	Box plots of throwing distances by event for men and women	28
3.29	Box plots of throwing log distance by events for men and women	29
3.30	Box plots of throwing log-distance by year adjusted for events	29
3.31	Means & 95% confidence intervals of log-distance adjusted for events	30
3.32	Box plots of throwing log-distance by event adjusted for year	30
3.33	Means & 95% confidence intervals	31
4.1	The results from fitting the multiple linear regression model to men swimming	33
4.2	Men swimming using logarithm of speed to measure performance	35
4.3	Women swimming using logarithm of speed to measure performance	36
4.4	Men running using logarithm of speed to measure performance	37
4.5	Women running using logarithm of speed to measure performance	38
4.6	Jumping using logarithm of distance to measure performance	40
4.7	Throwing using logarithm of distance to measure performance	41
4.8	Comparison of performances in different sports	44
5.1	The year effects and the fitted quadratic model	45
