

Acknowledgements

Though only my name appears on the cover of this dissertation, a great many people have contributed to its production. I owe my gratitude to all those people who have made this dissertation possible.

My deepest gratitude is to my advisor, Prof. Don McNeil (Ajan Don). I have been amazingly fortunate to have an advisor who gave me the freedom to explore on my own, making me write and rewrite the papers, stopping at nothing short of excellence, driving me the extra mile for the purpose of making me reach my fullest potential in this study. My co-advisor, Asst. Prof. Chamnein Choonpradub, has been always there to listen and give advice. Besides my advisor, I would like to thank Dr. Petchawan Pungrassami (examiner) for encouragement and insightful comments. I am also grateful to Asst. Prof. Dr. Apiradee Lim, Asst. Prof Dr. Phattawan Tongkumchum, Asst. Prof Dr. Nittaya McNeil and Asst. Prof Dr. Metta Kunning and rest of our faculties. I thank my old and new PhD and masters students, for years we were working together in lab and for all the fun we have had in the last three years.

I am grateful to the Ministry of Public Health, Thailand and National Tuberculosis Center (NTC), Nepal for providing the data. I would like to acknowledge the Graduate School and, Prince of Songkla University for funding this study.

Most importantly, none of this would have been possible without the love and patience of my family. My family, to whom this dissertation is dedicated to, has been a constant source of love, concern, support and strength all these years.
