Abstract	5
Acknowledgments	8
Contents	9
List of Tables	11
List of Figures	12
Chapter	
1. Introduction	
1.1 Background and rationale	14
1.2 Objectives	15
1.3 Expected advantages	15
1.4 Definition of perinatal originating conditions	15
1.5 Literature reviews	16
1.6 Plan of thesis	22
2. Methodology	
2.1 Study design	23
2.2 Study groups	23
2.3 Data collection and management	23
2.4 Path diagram and variables	26
2.5 Statistical methods	29
3. Preliminary Data Analysis	
3.1 Number of deaths	31
3.2 Estimating number of deaths	35
3.3 Children under-five death rates	37

	Page
3.4 Distribution of death rates	39
4. Statistical Modeling	
4.1 All-cause death rates	41
4.2 Perinatal originating conditions death rates	47
5. Conclusions and Discussion	
5.1 Summary of findings	53
5.2 Discussion	55
5.3 Limitations and future study	57
References	59
Appendix	65
Vitae	72

## List of Tables

Tables	Page
Table 2.1: Labels for Public Health Area	28
Table 3.1: Cause of deaths for children under-five years	31
Table 3.2: Frequency distribution of deaths for children under-five years	33
Table 4.1: Coefficients, standard errors, and p-values based on log-linear regression model fitted to all-cause death rates	43
Table 4.2: Coefficients, standard errors, and p-values based on log-linear regression model fitted to perinatal originating conditions death rates	49

## List of figures

Figures	Page
Figure 2.1: Path diagram	26
Figure 2.2: Pubic Health Area (PHA) map of Thailand	27
Figure 3.1: Numbers of children under-five years death by gender, PHA and year	34
Figure 3.2: Numbers of children under-five years death by gender, cause and year	35
Figure 3.3: Association between VA and DR groups	35
Figure 3.4: Association between outcome and determinants	36
Figure 3.5: Cumulative graphs from children under-five years deaths in 2000-2009	37
Figure 3.6: Death rates by gender	38
Figure 3.7: Trends of death rates for boys by PHA	38
Figure 3.8: Trends of death rates for girls by PHA	39
Figure 3.9: The distribution of death rates	40
Figure 4.1: Residuals plot for log-linear regression model of all-cause deaths	42
Figure 4.2: Plot of observed death rates against fitted values from log-linear regression model of all-cause	42
Figure 4.3: Confidence intervals for PHA gender and year of all-cause death rates per 100,000 population from log-linear regression model	44
Figure 4.4: Bar chart of all-cause death rates per 100,000 population	45

Figures	Page
Figure 4.5: The map of all-cause death rates for each PHA from log-linear regression model	46
Figure 4.6: Residuals plot for log-linear regression model of perinatal originating conditions	47
Figure 4.7: Plot of observed death rates against fitted values from log-linear regression model of perinatal originating conditions	48
Figure 4.8: Confidence intervals for PHA gender and year of perinatal originating conditions death rates per 100,000 population from log-linear regression model	50
Figure 4.9: Bar chart of perinatal originating conditions death rates per 100,000 population	51
Figure 4.10: The maps of perinatal originating conditions death rate for PHA from log-linear regression model	52
