Abstract	v
Acknowledgements	ix
Contents	x
List of Tables	xiii
List of Figures	xvi
List of Acronyms	xviii
Chapter	
1. Introduction	1
1.1 Overview of the thesis	1
1.2 Rationale	2
1.3 Objectives	4
1.4 Literature Review	5
1.4.1 Mortality data from the national Vital Registration system	5
1.4.2 Verbal autopsy	10
1.4.3 Transport accident mortality	13
1.4.4 Statistical method for estimating transport accident deaths	17
1.4.5 Statistical method for investigating the patterns of transport accident deaths	18
1.4.6 Summary of literature review	19
1.5 Path diagram and variables	21

Contents (cont.)

	Page
2. Methodology	23
2.1 Study design	23
2.2 Data sources	23
2.3 Data management	25
2.4 Statistical analyses for estimating transport accident deaths and external causes of deaths in Thailand based on VA study	33
2.5 Statistical analyses for exploring patterns of transport accident mortality rates in Thailand	37
2.6 Statistical software	40
3. Details of the studies	41
3.1 Article I: A logistic regression model for estimating transport accident deaths using Verbal Autopsy data	41
3.1.1 Preliminary results	41
3.1.2 Statistical model	46
3.2 Article II: Estimating external causes of death in Thailand 1996-2009 based on the 2005 Verbal Autopsy study	56
3.2.1 Preliminary results	56
3.2.2 Statistical model	65
3.3 Article III: Epidemiological patterns of transport accident mortality in Thailand	70
3.3.1 Preliminary results	70

Contents (cont.)

	Page
3.3.2 Statistical model	70
4. General discussion and conclusions	75
4.1 Summary of overall finding	75
4.1.1 Discussion and conclusions	76
4.2. The strengths and weaknesses of this study	80
4.2.1 Strengths of the study	80
4.2.2 Limitations	81
4.3. Applicability of the findings and implications for policy recommendations	81
4.4. Further study	82

List of Tables

Table		Page
Table 2.1	Codes for 76 provinces separate by four regions in Thailand	24
Table 2.2	VA counts for 22 major causes of deaths in Thailand, 2005: The VA study	27
Table 2.3	VR reported causes of transport accident deaths attributed to other VA-assessed causes of deaths	30
Table 2.4	VR reported causes of other accident deaths attributed to other VA-assessed causes of deaths	31
Table 2.5	VR reported causes of suicide deaths attributed to other VA- assessed causes of deaths	32
Table 2.6	Percentage of VR reported of ill-defined deaths years 1996 to 2009	36
Table 3.1	Number and percent of VR reported causes of transport accident deaths attribute to other VA-assessed causes of deaths	42
Table 3.2	Percentage deaths due to transport accident deaths in each province, gender-age group and VR cause-location group	44
Table 3.3	Coefficients and standard errors for three determinants based on logistic regression model fitted to transport accident deaths in Thailand	46
Table 3.4	Likelihood-ratio test for logistic regression model of transport accident deaths by province, gender-age group and VR cause- location group	49

List of Tables (cont.)

Table		Page
Table 3.5	Coefficients and standard errors of logistic regression model fitted based on treatment contrasts	51
Table 3.6	Ratio of VR reported and VA-estimated of transport accident deaths years 1996 to 2009	55
Table 3.7	Number and percent of VR reported causes of other accident deaths attributed to other VA-assessed causes of deaths	57
Table 3.8	Number and percent of VR reported causes of suicide deaths attributed to other VA-assessed causes of deaths	60
Table 3.9	Percentage deaths of other accident deaths in each province, gender-age group and VR cause-location group	62
Table 3.10	Percentage deaths due to suicide deaths in each province, gender-age group and VR cause-location group	64
Table 3.11	Likelihood-ratio test for logistic regression model of other accident deaths by province, gender-age group and VR cause-location group	66
Table 3.12	Likelihood-ratio test for logistic regression model of suicide deaths by province, gender-age group and VR cause-location group	66
Table 3.13	Ratios of VA-estimated deaths from models and VR-reported deaths, 2005	68

List of Tables (cont.)

Table		Page
Table 3.14	Ratio of VR reported deaths to VA-estimated deaths for three cause groups during the years 1996 to 2009	69
Table 3.15	Transport accident deaths from VR-reported and VA-estimated by year	70
Table 3.16	Name of province for each group by region in Thailand	71
Table 3.17	Transport accident mortality rates for each group years 2004 to 2009	73

List of Figures

Figure		Page
Figure 1.1	Process of death registration in Thailand	6
Figure 1.2	Vital registrations before 1996 and after 1996	7
Figure 1.3	Map of the number of samples in the nine provinces of the Thai 2005 VA study	12
Figure 1.4	Compared leading causes of death between 2004 and 2030	14
Figure 1.5	Workflow of this study	20
Figure 1.6	Path diagram for transport accident deaths	21
Figure 1.7	Path diagram for other accident deaths	21
Figure 1.8	Path diagram for suicide deaths	22
Figure 1.9	Path diagram for transport accident mortality rates	22
Figure 2.1	List of data sources for this study	26
Figure 2.2	A cross-tabulation of the number of VR counts and corresponding VA counts from 22 major cause groups. Area of bubbles denote numbers of death	29
Figure 3.1	Bar chart crude percentages and 95% CI of adjusted percentages of transport accident deaths by province, gender- age group and VR cause-location group	49
Figure 3.2	ROC curve for the logistic regression model of transport accident death	50

List of Figures (cont.)

Figure		Page
Figure 3.3	Sensitivity and false positive rate based on logistic regression model were used to predict errors for individual of transport accident deaths year 2005	51
Figure 3.4	Plot of the nine province coefficients from the model and a thematic map of values interpolated from the coefficients in the logistic regression model for all 76 provinces for transport accident deaths in 2005	54
Figure 3.5	Area plot for comparing number of transport accident deaths between VA-estimated and VR reported for males and females by age groups from 1996 to 2009	55
Figure 3.6	Cut-off point of ROC curves for logistic regression model of three cause groups	67
Figure 3.7	ROC curve for logistic regression models of three cause groups	67
Figure 3.8	Area plots of estimated deaths in the target population in Thailand's 2005	68
Figure 3.9	Poisson coefficients and regression coefficient of nine region-year groups from 2004 to 2009	71
Figure 3.10	Residuals plot of transport accident deaths for all ages in nine region-year groups, 2004 to 2009	74
