Thai Abstract	v
English Abstract	viii
Acknowledgments	xi
Contents	xii
List of Tables	xvi
List of Figures	xvii
Abbreviates	xix
Chapter 1 Introduction	1
1.1 Background	1
1.2 Rationale of the thesis	2
1.3 Objectives of the thesis	3
1.4 Literature review	4
1.5 Path diagram and variables	16
Chapter 2 Methodology	19
2.1 Process of analysis	19
2.2 Methodology of Part I: Estimation of mortality with missing data using logistic regression	22

Contents (cont.)

	Page
2.2.1 Data sources and management of Part I	22
2.2.2 Statistical analysis of Part I	23
2.2.3 Graphical methods for data analysis of Part I	26
2.3 Methodology of Part II: Correcting and estimating HIV mortality in Thailand based on 2005 verbal autopsy data focusing on demographic factors, 1996-2009	27
2.3.1 Data sources and management of Part II	27
2.3.2 Statistical analysis of Part II	31
2.3.3 Graphical methods for data analysis of Part II	36
2.4 Methodology of Part III: Exploring mortality patterns of all-cause and HIV from 1996-2009	37
2.4.1 Data sources and management of Part III	37
2.4.2 Statistical analysis of Part III	37
2.4.3 Graphical methods for data analysis of Part III	40
Chapter 3 Results	42
3.1 Part I: Estimation of mortality with missing data using logistic regression	42
3.1.1 Preliminary results	42
3.1.2 Results	47
3.2 Part II: Correcting and estimating HIV mortality in Thailand based on 2005 verbal autopsy data focusing on demographic factors , 1996-2009	52

Contents (cont.)

	Page
3.2.1 Preliminary results	52
3.2.2 Results	54
3.3 Part III: Exploring mortality patterns of all-cause and HIV from 1996-2009	59
3.3.1 Results (Part III A: All-cause mortality patterns from 1996-2009)	59
3.3.2 Results (Part III B: HIV mortality patterns from 1996-2009)	64
Chapter 4 Discussion and Conclusions	68
4.1 Summary of overall findings	68
4.2 Discussion	68
4.3 Conclusions	73
4.4 Limitations	73
4.5 Recommendations	75
References	76
Appendix I Proceeding	88
Appendix II Article “Estimation of mortality with missing data using logistic regression”	94
Appendix III Article “Correcting and estimating HIV mortality in Thailand based on 2005 verbal autopsy data focusing on demographic factors, 1996-2009”	101

Contents (cont.)

	Page
Appendix IV Table of HIV VA-estimated and DR-reported deaths from 1996-2009 by sex and age groups	110
Vitae	111

Prince of Songkla University
Pattani Campus

List of Tables

	Page
Table 1.1 Percentages of ill-defined cause from 1996-2009	6
Table 2.1 Process of analysis	19
Table 2.2 Cause groups based on VA counts	29
Table 3.1 Number of deaths and percentage unknown of province and age, 1996-2009	43
Table 3.2 Results from the simple cross-referencing model	54
Table 3.3 Results from logistic regression, full model	55

Figure 1.1 Workflow of this thesis	16
Figure 1.2 Path diagram of unknown province or age in Part I	17
Figure 1.3 Path diagram of correcting HIV deaths in Part II	18
Figure 1.4 Diagram of Thai mortality patterns of all-cause and HIV in Part III	18
Figure 2.1 The map of nine provinces and sample sizes of death ages 5 years and older in the 2005 VA study	28
Figure 3.1 Plots of deviance residuals versus theoretical quantiles based on logistic regression models for predicting the percentage of deaths in Thailand from 1996-2005 with unknown province and age	44
Figure 3.2 Estimates with 95% confidence intervals for percentages of deaths with unknown province in Thailand from 1996-2005	45
Figure 3.3 The thematic map of unknown age from 1996-2005	47
Figure 3.4 Estimates with 95% confidence intervals for percentages of deaths with unknown province in Thailand in 1997 (upper panel) and 2004	49
Figure 3.5 Estimates with 95% confidence intervals for percentages of deaths with unknown age in Thailand in 1997 (upper panel) and 2004	50
Figure 3.6 The thematic map of unknown age in 1997 and 2004	52
Figure 3.7 The cross-referencing between DR cause groups and VA cause groups of the 2005 VA data	53
Figure 3.8 Percentage of HIV DR-reported deaths out of all deaths	54

List of Figures (cont.)

	Page
Figure 3.9 Estimated percentage of HIV-related deaths out of all deaths, based on the VA assessment (bars) and based on the full model (blue diamonds with error bars)	56
Figure 3.10 The ROC curve of logistic regression model with demographic covariates and without demographic covariates (Model A includes no demographic covariates whereas model B includes covariates)	58
Figure 3.11 Triangulation for interpolating province coefficients in 2005	59
Figure 3.12 Thailand male death registration trend after corrected for unknown province and age, 1996-2009	60
Figure 3.13 Thailand female death registration trend after corrected for province and age, 1996-2009	61
Figure 3.14 Trends in spline-smoothed deaths in six provinces from 1996-2009	63
Figure 3.15 Trends in spline-smoothed deaths by sex from 1996-2009	64
Figure 3.16 DR-reported and VA-estimated HIV deaths from the model with demographic covariates for both sexes, 1996-2009 (Model A includes no demographic covariates whereas model B includes demographic covariates)	66
Figure 3.17 Trends of HIV-estimated deaths from 1996-2009	67
