## LIST OF TABLES

<b>Table</b>		<b>Page</b>
1	Number and percentage of subjects according to demographic data	72
2	Number and percentage of subjects regarding health related factors	75
3	Number and percentage of subjects changing their situation and health behavior during the period of study	77
4	Number and percentage of subjects regarding stress level	78
5	Comparative analysis of mean score difference on stress within experimental and control group	80
6	Comparative analysis of mean score difference on stress between experimental and control group	61
7	Comparative analysis of mean score difference on SBP within the experimental group and the control group	82
8	Comparative of difference in mean rank value of SBP between the experimental group and the control group	84
9	Comparative analysis of mean score difference on DBP between the experimental group and the control group	85
10	Comparative of difference in mean rank value of DBP between the experimental group and the control group	87
11	Comparative analysis of mean score difference on HR between the experimental group and the control group	88
12	Comparative of difference in mean rank value of HR between the experimental group and the control group	90
13	Comparative analysis of mean score difference on RR between the experimental group and the control group	91

### LIST OF TABLES (continued)

<b>Table</b>		<b>Page</b>
14	Comparative of difference in mean rank value of RR between the experimental group and the control group	93
15	Comparative analysis of mean score difference on BW between the experimental group and the control group	94
16	Comparative of difference in mean rank value of BW between the experimental group and the control group	96
17	Summary of comparative analysis of stress, SBP, DBP, HR, RR, and BW before and after the experiment between the experimental and the control group	97
