## LIST OF TABLES

<b>Table</b>		<b>Page</b>
1	Patients' and spouses' demographic characteristics.....	42
2	Patients' health characteristics.....	44
3	Spouses' health characteristics.....	46
4	Means, standard deviations, ranges, skewness, kurtosis, and coefficient of variance of sub-scale and total scores of patients' and spouses' coping strategy .....	47
5	Proportional converted score of the means and standard deviations of patients' and spouses' coping strategy.....	48
6	The top ten patients' and spouses' affective coping strategies 'often and almost always' used by the subjects .....	49
7	The top ten patients' and spouses' problem solving coping strategies that 'often and almost always' used by the subjects.....	50
8	Frequency and percentage of the subjects according to level of overall quality of life and general health .....	51
9	Means, standard deviations, ranges, skewness, kurtosis, and coefficient of variance for each dimension of patients' and spouses' quality of life .....	53
10	The mean scores and standard deviations of the five lowest items of patients' and spouses quality of life.....	54
11	The mean scores and standard deviations of the top five items of patients' and spouses quality of life.....	55
12	Correlation between coping strategies and total score quality of life for patients and spouses .....	56
