LIST OF ABBREVIATIONS

°C	=	degree Celsius
IC ₅₀	=	inhibitory concentration at 50% of maximum response
G	=	gram
kg	=	kilogram
M	=	molar
mg	=	milligram
ml	=	milliliter
mM	=	millimolar
μM	=	micromolar
μg	=	microgram
ng	=	nanogram
%	=	percent
S.E.	=	standard error
h	=	hour
ACh	=	acetylcholine
5-HT	=	serotonin
KCl	=	potassium chloride
CaCl ₂	=	calcium chloride
NaCl	=	sodium chloride
NaHCO ₃	=	sodium bicarbonate
MgSO ₄	=	magnesium sulfate
KH ₂ PO ₄	=	potassium dihydrogen phosphate
X	=	mean

LIST OF TABLES

Table	Page
1	Substances that may be neurotransmitters or neuromodulators in the enteric nervous system..... 36
2	Yield and texture of methanolic extract from each plant..... 69
3	Effect of methanolic extracts of <i>P. longum</i> , <i>P. sarmentosum</i> and <i>Q. infectoria</i> on caecal amoebiasis of mice 71
4	IC ₅₀ values (concentration producing 50% of maximum inhibition of agonist-induced contractions of rat or guinea-pig isolated ileums, n = 5) of the three plant methanolic extracts, loperamide, verapamil, the muscarinic receptor antagonist, atropine; the serotoninergic receptor antagonist, cyproheptadine and the histaminergic receptor antagonist, chlorpheniramine 80
5	Comparison of the potencies (on µg/ml concentration basis) of the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> on the inhibition of the agonist-induced contractions of rat or guinea-pig ileums with those of: (a) loperamide (Lop) and (b) verapamil (Ver) and (c) atropine (Atrop), cyproheptadine (Cypro) and chlorpheniramine (CPM)..... 81
6	The inhibitory effects of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> methanolic extracts and loperamide on the phasic and tonic contraction-induced by KCl of rat ileums 83
7	The IC ₅₀ values of the three plant extracts and loperamide on the inhibition of phasic and tonic contractions of KCl-induced contraction of rat ileums and their potency ratios 83

LIST OF FIGURES

Figure		Page
1	<i>Entamoeba histolytica</i>	4
2	Structural formula of metronidazole	8
3	Photograph of medicinal plants	13
4	The general organization of the layers of the gastrointestinal tract.....	24
5	Neural control of the gut wall	27
6	Diagram of the wall of the small intestine	28
7	Sources of intracellular Ca^{2+}	38
8	Positive and negative-feedback loops regulating Ca^{2+} entry	39
9	Putative mechanisms for activation of Ca^{2+} by agonists.....	40
10	Calcium-mobilizing intracellular messengers.....	42
11	Mechanisms of smooth muscle contraction and signal transduction mechanisms.....	45
12	Mechanisms of agonists-induced contraction and relaxation.....	46
13	The balance between the relaxant or contractile state of smooth muscle.....	52
14	Signaling cascade initiated by contractile agonist in intestinal longitudinal muscle cells.....	59
15	Dual signaling cascade initiated by interaction of VIP with two receptor subtypes.....	60
16	Set up of isolated ileum preparation in organ bath for recording of its contraction	66

LIST OF FIGURES (Continued)

Figure	Page
17	Representative recordings of the acetylcholine-induced contractions of isolated rat ileums and the inhibitions by various concentrations of the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> 73
18	Representative recordings of the serotonin-induced contractions of isolated rat ileums and the inhibitions by various concentrations of the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> 74
19	Representative recordings of the histamine-induced contractions of isolated guinea-pig ileums and the inhibitions by various concentrations of the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> 75
20	Inhibition of acetylcholine-induced contractions of isolated rat ileums by atropine, loperamide, verapamil and the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> 76
21	Inhibition of serotonin-induced contractions of isolated rat ileums by cyproheptadine, loperamide, verapamil and the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> 77
22	Inhibition of histamine-induced contractions of isolated guinea-pig ileums by cyproheptadine, loperamide, verapamil and the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i> 78

LIST OF FIGURES (Continued)

Figure		Page
23	Representative recordings of potassium chloride-induced contractions (each consists of phasic, initial rapid contraction, followed by a sustained tonic contraction) of rat ileums and the inhibition by various concentrations of the methanolic extracts of <i>P. sarmentosum</i> , <i>P. longum</i> and <i>Q. infectoria</i>	82
24	Inhibition of potassium chloride-induced phasic contraction (A) and tonic contraction (B) of rat ileums by loperamide (0.3-10 µg/ml), <i>P. sarmentosum</i> (0.01-1 mg/ml), <i>P. longum</i> (0.01-1 mg/ml) and <i>Q. infectoria</i> (0.1-10 mg/ml)	84
25	Representative recordings of the effects of the methanolic extract of (b) <i>P. longum</i> (0.1-1 mg/ml), (c) <i>P. sarmentosum</i> (0.1-1 mg/ml), (d) <i>Q. infectoria</i> (1-10 mg/ml), (e) loperamide (0.1-1 µg/ml) and (f) verapamil (0.01-0.1 µM) on the contractions of guinea pig ileum-induced by calcium chloride (added cumulatively), in comparison with those of time control (a).....	86
26	Cumulative concentration-effects of calcium chloride induced-contractions of isolated guinea-pig ileums and the antagonisms by <i>P. sarmentosum</i> methanolic extract and <i>P. longum</i> methanolic extract.....	87
27	Cumulative concentration-effects of calcium chloride induced-contractions of isolated guinea-pig ileum and the antagonisms by <i>Q. infectoria</i> methanolic extract and loperamide	88

LIST OF FIGURES (Continued)

Figure		Page
28	Cumulative concentration-effects of calcium chloride-induced contraction of isolated guinea-pig ileums and the antagonisms by verapamil.	89
