List of Abbreviations and Symbols	x
Chapter	
1. Introduction	1
1.1. Introduction	1
1.2. Objective of the study	4
2. review of Literature	
2.1. Ketoconazole	5
2.2. Efavirenz	13
2.3. Cytochrome P450 System	20
2.4. The HIV life cycle	29
3. Methodology of Study	34
4. Results	41
5. Discussion and conclusion	53
Bibliography	59
Appendix	73

LIST OF TABLES

Table	Page
1 : Recovery of ketoconazole	43
2 : Precision of the analytical method, intraday and interday precision	44
3 : Demographic data of the patients in the study	45
4 : Plasma ketoconazole concentration for each patient during phase 1	47
5 : Plasma ketoconazole concentration for each patient during phase 2	48
6 : Pharmacokinetic parameters of ketoconazole in each of the twelve patients during phase 1	50
7 : Pharmacokinetic parameters of ketoconazole in each of the twelve patients during phase 2	51
8 : Effect of efavirenz on ketoconazole pharmacokinetics in each of twelve HIV-infected patients	52

LIST OF FIGURES

Figure	Page
1 : The chemical structure of ketoconazole	5
2 : Model for mechanism of action of ketoconazole	6
3 : The chemical structure of efavirenz	13
4 : Examples of Phase I Reactions	21
5 : Structures of cofactors for phase II biotransformation	22
6 : Reaction of electrophilic metabolites with GSH	22
7 : The catalytic cycle of cytochrome P450	25
8 : The structure of HIV	30
9 : Model for HIV enters a cell	31
10 : Model for HIV takes control of the cell	31
11 : Model for HIV becomes part of the infected cell	32
12 : Model for HIV tricks the infected cell into making copies of itself	33
13 : HPLC chromatograms of ketoconazole 8 µg/ml in methanol, ketoconazole 8 µg/ml in plasma and drug free plasma	41
14 : Calibration curve of ketoconazole in plasma	42
15 : The mean plasma concentration-time profiles of ketoconazole in 12 HIV-infected patients	49
16 : Plasma ketoconazole concentration-time curve of patient No.1	82
17 : Plasma ketoconazole concentration-time curve of patient No.2	82
18 : Plasma ketoconazole concentration-time curve of patient No.3	83
19 : Plasma ketoconazole concentration-time curve of patient No.4	83
20 : Plasma ketoconazole concentration-time curve of patient No.5	84
21 : Plasma ketoconazole concentration-time curve of patient No.6	84
22 : Plasma ketoconazole concentration-time curve of patient No.7	85
23 : Plasma ketoconazole concentration-time curve of patient No.8	85

LIST OF FIGURES (Continued)

Figure	Page
24 : Plasma ketoconazole concentration-time curve of patient No.9	86
25 : Plasma ketoconazole concentration-time curve of patient No.10	86
26 : Plasma ketoconazole concentration-time curve of patient No.11	87
27 : Plasma ketoconazole concentration-time curve of patient No.12	87
28 : The individual ketoconazole maximum concentration (C_{max}), area under the curve (AUC_{0-24}) and half-life ($t_{1/2}$) of ketoconazole in 12 HIV-infected patients on day 1 and 16	88

LIST OF ABBREVIATIONS AND SYMBOLS

AIDS	= acquired immunodeficiency syndrome
Alb	= albumin
AUC	= area under the concentration-time curve
BUN	= blood urea nitrogen
CD ₄	= antigenic marker of the helper/inducer T cells
Cl	= clearance
C _{max}	= maximum concentration
C _{min}	= minimum concentration
Cr	= creatinine
%CV	= percentage of coefficient of variation (=standard deviation x 100/mean)
CYP	= cytochrome P450
f _u	= fraction of unbound
GI	= gastrointestinal
h	= hour
Hb	= hemoglobin
Hct	= hemotocrits
HIV	= human immunodeficiency virus
HPLC	= high performance liquid chromatography
Kg	= kilogram
L	= liter
Lymph	= lymphocyte
μg	= microgram
μl	= microliter
μm	= micrometer
mg	= milligram
ml	= milliliter

LIST OF ABBREVIATIONS AND SYMBOLS (Continued)

min	= minute
mm ³	= cubic milliliter
M	= molar
MW	= molecular weight
NRTI	= nucleoside reverse transcriptase inhibitors
NNRTI	= non-nucleoside reverse transcriptase inhibitors
PI	= protease inhibitors
rpm	= round per minute
SD	= standard deviation
SGOT	= serum glutamic-oxaloacetic transaminase
SGPT	= serum glutamic-pyruvic transaminase
T _{max}	= time to reach maximum concentration
t _{1/2}	= half-life
%v/v	= percentage of volume by volume
V _z	= volume of distribution
WBC	= white blood cell count
