Appendix	63
Vitae	78

LIST OF TABLES

Table	Page
1. Distribution of animal into the experimental group.	25
2. The result record after the specimens were applied force in all groups.	30
3. Comparison of the 2 treatment groups.	38
4. The statistics data compared within group and between group.	38
5. The screw engagement before testing.	44
6. The screw engagement after testing.	45
7. The statistical data of the screw engage.	46
8. The descriptive analysis of the Ti group - Re group - control group.	65
9. The Mann-Whitney U-test data of the titanium group and the resorbable group.	66
10. The Mann-Whitney U-test data of the Ti. gr. 1 sub. 1- Ti. gr. 2 sub.1	66
11. The Mann-Whitney U-test data of the Re. gr.1 sub. 1- Re. gr.2 .	67
12. The Mann-Whitney U-test data of the titanium group1 and the resorbable group1.	67
13. The Mann-Whitney U-test data of the titanium group1and the titanium group2.	68
14. The Mann-Whitney U-test data of the titanium group1and the titanium control group.	68

LIST OF TABLES (Continued)

Table	Page
15. The Mann-Whitney U-test data of the resorbable group1 and the resorbable group 2.	69
16. The Mann-Whitney U-test data of the resorbable group1 and the resorbable group 3.	69
17. The Mann-Whitney U-test data of the titanium group2 and the resorbable group 2.	70
18. The Mann-Whitney U-test data of the titanium group- the resorbable group – control group.	70
19. The Mann-Whitney U-test data of the titanium group- the resorbable group – no control group	71
20. The Mann-Whitney U-test data of the titanium group- the control group.	71
21. The Mann-Whitney U-test data of the Ti. gr.1 sub1 and the control group.	72
22. The Mann-Whitney U-test data of theTi. gr.2 and the control group.	72
23. The Mann-Whitney U-test data of theTi. gr.1 sub.2 and Re. gr.1sub.2.	73
24. The Mann-Whitney U-test data of theTi. gr.1 sub.1 and Re. gr.1sub.1.	73
25. The Mann-Whitney U-test data of theTi. gr.1 sub.3 and Re. gr.1sub.3.	74

LIST OF TABLES (Continued)

Table	Page
26. The Mann-Whitney U-test data of theTi. gr.2sub.1 and Re. gr.2sub.1.	74
27. The Mann-Whitney U-test data of theTi. gr.2sub.2 and Re. gr.2sub.2.	75
28. The Mann-Whitney U-test data of theTi. gr.2sub.3 and Re. gr.2sub.3.	75
29. The Mann-Whitney U-test data of the resorbable group1 and the resorbable control group.	76
30. The Mann-Whitney U-test data of the resorbable group 2 and the resorbable control group.	76
31. The Mann-Whitney U-test data of the titanium group 2 and the resorbable group 2.	77
32. The group statistics data of the resorbable group –resorbable control group.	77
33. The group statistics data of the titanium group – titanium control group.	78

LIST OF FIGURES

Fig.	Page
1.The chemical structure of lactic acid, glycolic acid, PLGA copolymer.	12
2.The metabolism of PLA,PGA.	15
3.The load –displacement curve.	17
4.Gross specimen of bovine hemimandible	19
5.Show the titanium plate, screws	19
6.The resorbable plate, screws	20
7. Resorbable plate and screws preparation.	20
8.The resorbable plate and screw activated by heating and bended for adaptation.	21
9.The universal screwdriver is used for all screw sizes.	22
10.Screw insertion method.	22
11.Bilateral sagittal split ostetomies procedures.	23
12.Show hemimandibular were set back in the experimental groups.	24
13.Show the specimens were fixed by the rigid fixation.	24
14.The custom made cradle.	25
15.The universal testing machine.	26
16.The specimen in the custom made cradle.	27
17.The Perio–test.	28
18.The prepared specimen after fixed by plate and screws.	28
19.The titanium plate and screws after applied vertical load.	31

LIST OF FIGURES (Continued)

Fig.	Page
20.The graphs demonstrated the load/ displacement curve in the titanium group.	33
21.The resorbable plate and screws after applied vertical load.	35
22.The graphs demonstrated the load/ displacement curve in the resorbable group.	36
23.The graph show the relation of the type of plate and the maximum load.	39
24.The graph show the relation of the maximum load and deflection at maximum load.	40
25.The graph show the relation of the load at rupture and deflection at rupture.	40
26. The graph show the relation of the titanium ,resorbable group 1,2,3 and the stiffness.	41
27. The graph show the relation of the titanium ,resorbable group 1,2,3 and maximum load.	41
28.The graph show the relation of group of each resorbable plate and the stiffness.	42
29.The graph show the relation of group of each titanium plate and the stiffness.	42
30.The bar graph reveal the relation of group of type of plate and the stiffness	43
31.Graph show the stiffness in Ti. group and Re. group	47

LIST OF FIGURES (Continued)

Fig.	Page
32. Graph show the maximum load in Ti. group and Re. group.	47
33. Graph show the deflection at maximum load in Ti. group and Re. group.	48

LIST OF ABBREVIATIONS AND SYMBOLS

Fig. : the figure.

BSSRO: the bilateral sagittal split ramus osteotomies .

IMF : the intermaxillary fixation.

PLA : the poly lactic acid .

PGA : the poly glycolic acid.

PLLA : the poly -L- lactic acid.

PDLA : the poly -D-lactic acid .

Ti : titanium .

Re : resorbable.

kN: kilo newton.

Ti 1: titanium group 1 subject 1

Ti 2: titanium group 1 subject 2

Ti 3: titanium group 1 subject 3

Ti 4: titanium group 2 subject 1

Ti 5: titanium group 2 subject 2

Ti 6: titanium group 2 subject 3

Ti 7: titanium group 3 control

Re 1: resorbable group 1 subject 1

Re 2: resorbable group 1 subject 2

Re 3: resorbable group 1 subject 3

Re 4: resorbable group 2 subject 1

Re 5: resorbable group 2 subject 2

Re 6: resorbable group 2 subject

Re 7 : resorbable group 3 control

LIST OF ABBREVIATIONS AND SYMBOLS (Continued)

gr. : group

Sub. : subject

Sig. : significant

mm. : millimeter

N: newton
