

Chapter 5

Conclusion

Conclusion

From the result of this study, we may be concluded that Bio-Oss[®] with PRP did not make a significant difference in the new bone formation in the rabbit calvarial bone when compared with Bio-Oss[®] alone.

Acknowledgements:

The author would like to acknowledge my advisers, Assoc. Prof. Wilad Sattayasanskul, Assist. Prof. Thongchai Nuntanaranon and Dr. Surapong Vongvatcharanon, for their contribution to this thesis. Moreover, I would like to acknowledge Mr. Virachai Polsiri from RUSHMORE PRECISION for their assistance with the histomorphometric analysis.
