List of Tables.....	xvi
List of Figures.....	xvii
List of Abbreviations and Symbols.....	xix

### **Chapter 1. Introduction and Literature Review**

Introduction.....	1
Literature review.....	4
1. Lipases.....	4
1.1 Sources of lipases.....	4
1.2 Lipase-catalyzed reactions.....	5
1.3 Specificity of lipases.....	7
2. Immobilized lipases.....	9
2.1 Effect of support matrix.....	9
2.2 Effects of solvents.....	10
2.3 Effect of water on enzyme activity in organic media.....	11
3. Application of immobilized lipases.....	12
4. Fish oils: The essential nutrients.....	12
5. <i>n</i> -3 Polyunsaturated Fatty Acids ( <i>n</i> -3 PUFA).....	13
5.1 Sources of <i>n</i> -3 PUFA.....	15
5.1.1 Fish oils.....	17
5.1.2 Seed oils.....	20
5.1.3 Algal lipids.....	20
6. Health Benefits of <i>n</i> -3 PUFA.....	21
6.1 Brain development effects.....	21
6.2 Cardiovascular and heart disease effects.....	22
6.3 Tumor and cancer effects.....	22

## CONTENTS (Continued)

	<b>Page</b>
6.4 Visual function effects.....	23
7. Lipase-catalyzed synthesis of ST containing PUFA.....	23
7.1 Production of ST enriched with PUFA by one-step processes.....	25
7.2 Production of ST enriched with PUFA by two-step processes.....	26
8. Enrichment of lipids with EPA and DHA by lipases.....	28
8.1 Recent developments and roles of lipase in <i>n</i> -3 PUFA field.....	28
8.2 Enrichment of TAG with EPA and DHA.....	30
8.2.1 Enrichment of cod liver oil with EPA and DHA.....	30
8.2.2 Homogeneous TAG of EPA and DHA.....	31
8.3 EPA and DHA concentrate from fish oil by lipases.....	33
9. Use of bioreactors for production of fats and oils.....	35
9.1 Batch Stirred Tank Reactor (BSTR).....	35
9.2 Packed-Bed Reactor (PBR).....	36
9.3 Membrane Reactor (MR).....	37
Objectives of study.....	38

### **Chapter 2. Two-Step Process Enzymatic Enrichment of *n*-3 Polyunsaturated Fatty Acids from Tuna Oil**

2.1 Abstract.....	39
2.2 Introduction.....	40
2.3 Materials and Methods.....	42
2.3.1 Materials.....	42
2.3.2 Preparation of the immobilized lipases.....	43
2.3.3 Hydrolysis of tuna oil.....	43
2.3.4 Extraction of FFA from the mixture.....	43
2.3.5 Selective esterification of fatty acids with long-chain alcohol.....	44
2.3.6 Urea complexation.....	44

## CONTENTS (Continued)

	<b>Page</b>
2.3.7 Analysis of acylglycerols by TLC-FID.....	45
2.3.8 Analysis of fatty acid compositions.. ..	45
2.3.9 Statistical analysis.....	46
2.4 Results and Discussion.....	46
2.4.1 Preparation of tuna oil and determination of compositions of glyceride species and fatty acids.....	46
2.4.2 Optimization of PUFA-rich FFA.....	47
2.4.2.1 Hydrolysis of tuna oil by different immobilized lipases.....	47
2.4.2.2 Separation of FFA from the reaction mixture.....	50
2.4.2.3 Enrichment of PUFA by selective esterification.....	50
2.4.2.4 Enrichment of PUFA by urea complexation.....	50
2.5 Conclusion.....	51
 <b>Chapter 3. Synthesis of Monoacylglycerol Rich in Polyunsaturated Fatty Acids from Tuna Oil with Immobilized Lipase AK</b>	
3.1 Abstract.....	55
3.2 Introduction.....	56
3.3 Materials and Methods.....	58
3.3.1 Materials.....	58
3.3.2 Hydrolytic activity of lipase.....	58
3.3.3 Preparation of immobilized lipase.....	58
3.3.4 Glycerolysis reaction.....	59
3.3.5 Analysis of glycerides by TLC-FID.....	59
3.3.6 Analysis of fatty acid compositions.....	59
3.3.7 Regiospecific analysis.....	60
3.3.8 Karl Fischer water content determination.....	60
3.3.9 Statistical analysis.....	60

## CONTENTS (Continued)

	<b>Page</b>
3.4 Results and Discussion.....	61
3.4.1 Screening of solvents for the enzymatic glycerolysis of tuna oil.....	61
3.4.2 Effect of water content.....	61
3.4.3 Effect of substrate concentration in MTBE.....	63
3.4.4 Effect of IM-AK loading.....	63
3.4.5 Effect of temperature.....	65
3.4.6 Stability of IM-AK in MTBE mixture.....	65
3.4.7 MAG production under optimal conditions.....	67
3.4.8 Kinetics of the glycerolysis using Lipase AK and IM-AK.....	69
3.5 Conclusion.....	70
<b>Chapter 4. Physicoenzymatic Production of Monoacylglycerols Enriched with Very Long Chain Polyunsaturated Fatty Acids</b>	
4.1 Abstract.....	71
4.2 Introduction.....	72
4.3 Materials and Methods.....	74
4.3.1 Materials.....	74
4.3.2 Preparation of the immobilized lipase.....	74
4.3.3 Enzymatic glycerolysis of tuna oil.....	75
4.3.4 Fractionation of PUFA-MAG from reaction mixture of glycerolysis of tuna oil.....	75
4.3.5 Analysis of acylglycerols by TLC-FID.....	76
4.3.6 Analysis of fatty acid compositions.....	76
4.3.7 Statistical analysis.....	77
4.4 Results and discussion.....	77
4.4.1 Screening of lipases.....	77
4.4.2 Optimization of glycerolysis of tuna oil with Novozym 435.....	80

4.4.2.1 Effect of solvent mixtures for glycerolysis of tuna oil.....	80
--	----

**CONTENTS (Continued)**

	<b>Page</b>
4.4.2.2 Effect of enzyme loading.....	80
4.4.2.3 Effects of solvent amount and substrate ratio.....	82
4.4.2.4 Effect of temperature.....	84
4.4.2.5 MAG production under optimal conditions.....	84
4.4.3 Fractionation of the reaction mixture from glycerolysis of tuna oil.....	86
4.5 Conclusion.....	87

**Chapter 5. Lipozyme TL IM-Catalyzed Synthesis of Triacylglycerols Containing Polyunsaturated Fatty Acids**

5.1 Abstract.....	89
5.2 Introduction.....	90
5.3 Materials and Methods.....	92
5.3.1 Materials.....	92
5.3.2 Preparation of MAG rich in PUFA.....	92
5.3.3 Enzymatic interesterification of FOEE and alcohol moiety with single experiment.....	93
5.3.4 Enzymatic interesterification of FOEE with variable step of addition of alcohol moiety.....	93
5.3.5 Experimental design.....	94
5.3.6 Analysis of acylglycerols by TLC-FID.....	94
5.3.7 Analysis of fatty acid compositions.....	95
5.3.8 Statistical analysis and evaluation.....	96
5.4 Results and Discussion.....	96
5.4.1 Screening of lipases.....	96
5.4.2 Effect of additional step of alcohol moiety.....	98
5.4.3 Selection of alcohol moiety.....	100

5.4.4 Model fitting.....	100
--------------------------	-----

**CONTENTS (Continued)**

	<b>Page</b>
5.4.5 Main effects of parameters.....	103
5.4.6 Optimization of the reaction system.....	103
5.5 Conclusion.....	109
 <b>Chapter 6. Summary and Future Works</b>	
6.1 Summary.....	110
6.2 Future works.....	111
 References.....	 112
Vitae.....	133

## LIST OF TABLES

<b>Table</b>		<b>Page</b>
1	Specific lipases for the production of specific structured lipids.....	4
2	DHA and EPA contents of extracted marine fish oil.....	14
3	Compositions of tuna oil.....	15
4	Fatty acid compositions of tuna oil.....	15
5	Amount of EPA and DHA in fish, crustacean and fish oils.....	16
6	GRAS specification for hydrogenated menhaden oils.....	18
7	Principal fatty acids of selected fish oils.....	19
8	<i>n</i> -3 fatty acid contents of some algae.....	21
9	Synthesis of ST containing PUFA from natural edible oils.....	25
10	Activity, protein content and specific activity of different lipases.....	42
11	Characteristic of the immobilized lipases.....	42
12	Glyceride contents of tuna oil.....	46
13	Fatty acid compositions of crude tuna oil and refined tuna oil.....	47
14	Fatty acid compositions of hydrolyzed tuna oil and FFA mixture after selective esterification and urea complexation.....	54
15	Fatty acid compositions of species of tuna oil and reaction product after TLC separation.....	68
16	Major fatty acid compositions of crude MAG fraction after solvent fractionation at low temperature from the mixture of hexane and acetone.....	88
17	The contents of TAG from different step of addition of alcohol moiety into the reaction mixture catalyzed by Lipozyme TL IM.....	99
18	Actual experimental settings of the reaction factors and responses from the experiments and analysis for the RSM modeling and evaluation.....	101
19	Regression coefficients ( $\square$ ) and significance ( <i>P</i> -value) of second-order polynomials after backward elimination.....	102

## LIST OF ABBREVIATIONS AND SYMBOLS

1,2-DAG	= 1,2-diacylglycerol
1,3-DAG	= 1,3-diacylglycerol
1-MAG	= 1-monoacylglycerol
2-MAG	= 2-monoacylglycerol
AA	= Arachidonic acid
DAG	= Diacylglycerol (diglycerides)
DHA	= Docosahexaenoic acid (C22:6)
EPA	= Eicosapentaenoic acid (C20:5)
FA	= Fatty acids
FAME	= Fatty acid methyl esters
FFA	= Free fatty acids
FHMO	= Full hydrogenated menhaden oil
FID	= Flame ionization detector
FOEE	= Fish oil ethyl esters
GC	= Gas chromatography
Gly	= Glycerol
GRAS	= General recognized as self
HPLC	= High performance liquid chromatography
IM-AK	= Immobilized Lipase AK
LA	= Linoleic acid
LCFA	= Long-chain fatty acid
MAG	= Monoacylglycerols (monoglycerides)
MCFA	= Medium-chain fatty acid
MLM	= Structured glyceride containing medium-chain fatty acids at the <i>sn</i> 1,3-positions and long-chain fatty acids at the <i>sn</i> 2-position.
MTBE	= Methyl- <i>tert</i> -butyl ether
PHMO	= Partial hydrogenated menhaden oil
PUFA	= Polyunsaturated fatty acids

SL = Structured lipids

ST = Structured triglycerides

### **LIST OF ABBREVIATIONS AND SYMBOLS (Continued)**

TA = Triacetin

TB = Tributyrin

TAG = Triacylglycerols (triglycerides)

TLC = Thin layer chromatography
