Abstract	(3)
Acknowledgements	(6)
List of tables	(9)
List of figures	(11)
Chapter	
1 Introduction	1
- Literature review	3
1.1 Malaria situation	3
1.2 Malaria vectors	9
1.3 Biology of <i>Anopheles</i>	9
1.3.1 Anopheline egg	9
1.3.2 Anopheline larva	11
1.3.3 Anopheline pupa	11
1.3.4 Anopheline adult	12
1.4 Vector control	13
1.5 Pyrethroids	15
1.6 Insecticide resistance	18
1.7 Pyrethroids resistance in disease vectors	19
1.8 Pyrethroids resistance mechanisms	21
1.8.1 Monooxygenases (Mixed function oxidases)	21
1.8.2 Esterases	22
1.8.3 Glutathione S-transferases	23
- Objectives	24

Contents (continued)

	Page
2 Materials and Methods	25
2.1 Materials	25
2.1.1 Mosquitoes test populations	25
2.1.2 Insecticide impregnated papers	25
2.2 Methods	25
2.2.1 Mosquito rearing	28
2.2.2 Bioassays	30
2.2.2.1 Susceptibility testing	30
2.2.2.2 Selection of deltamethrin resistance	30
2.2.2.3 WHO diagnostic test	31
2.2.3 Biochemical assays	31
2.2.3.1 Protein assay	32
2.2.3.2 Mixed Function Oxidases (MFOs)	32
2.2.3.3 Elevated esterases	32
2.2.3.4 Glutathins S-transferases	33
2.2.4 Data analysis	33
2.2.4.1 Susceptibility test	33
2.2.4.2 Biochemical assays	34
3 Results	35
4 Discussions	43
5 Conclusions	50
References	51
Appendix	62
Vitae	75

List of Tables

Table	Page
1 Malaria surveillance statistics in Thailand (Fiscal year 1987-2002)	5
2 Specie complexes of important malaria vectors in many different areas of Thailand	10
3 Quantity (tons) of DDT imported for use in Thailand for agricultural and public health purpose	14
4 <i>Anopheles</i> resistance to pyrethroids	20
5 Susceptibility data of deltamethrin based on dose/mortality relationships tested against <i>An. minimus</i> species A populations	36
6 Susceptibility data of deltamethrin (0.05%) based on time/mortality relationships tested against <i>An. minimus</i> species A populations	36
7 Mortality from WHO diagnostic test kit for 0.05% deltamethrin against 2 test populations of <i>An. minimus</i> speceies A,24 hr-post exposure	
8 Mortality from WHO diagnostic test kit for 4% DDT against <i>An. minimus</i> speceies A populations 24 hr-post exposure	40
9 Comparison of the specific activities of α and β non-specific esterases (Est) and monooxygenases (MFOs) from <i>An. minimus</i> species A populations (sample size 20)	41
10 Optical density (OD) of glutathion S-tranferases towards 1-chloro-2, 4-dinitrobenzene (CDNB) from <i>An. minimus</i> species A populations	42
11 Tentative diagnostic concentration and exposure times for adult mosquitoes	63
12 Preparation of diluted albumin (BSA) standards	71

List of Figures

Figure	Page
1 Reported cases o malaria per 100,000 populations in Thailand, 2000	4
2 Total malaria cases measured by standard malariometric indices in Thailand 1980-2001	6
3 Annual malaria mortality rate and eradication program in Thailand	8
4 General structure of synthetic pyrethroids	16
5 Main sites of cleavage of pyrethroids by esterase (Est) and mixed function oxidases (MFO)	21
6 Diagram shows strategy for establishment of pyrethroid resistant mosquitoes	27
7 Equipment for used to rearing mosquitoes	29
8 Log-dosage probit lines for deltamethrin selected (F_0 - F_{10}) adults of <i>An. minimus</i> species A populations	37
9 Log-time probit lines for deltamethrin selected (F_{14} - F_{19}) adults of <i>An. minimus</i> species A populations	38
10 Composition of test kit	65
11 Method for deltamethrin the susceptibility of resistance of adult mosquitoes	67
