CHAPTER

1 INTRODUCTION ....................................................... 1
   Background and Significance of the Research Problem .............. 1
   Objectives of the Study .............................................. 5
   Research Questions .................................................. 6
   Conceptual Framework .............................................. 6
   Definition of Terms .................................................. 8
   Significances of the study ......................................... 9

2 LITERATURE REVIEW .............................................. 10
   Ethical Dilemmas .................................................... 10
      Definition of ethical dilemmas .................................. 11
      Types/classification of ethical dilemmas in nursing care ....... 12
      Ethical dilemmas in nursing care for patients with mental illness 18
      Factors related to level of disturbance of ethical dilemmas .... 24
   Ethical Decision Making .......................................... 26
