Abstract	iii
Acknowledgements	v
Contents	vi
List of Tables	viii
List of Figures *	ix
Chapter 1: Introduction	1
1.1 Introduction	1
1.2 Southern Thailand	2
1.3 Demography History of Thailand	5
1.4 Demographic Concepts	6
1.5 Literature Review	10
1.6 Plan of Thesis	12
Chapter 2: Methodology	13
2.1 Computer Programs	13
2.2 Data Management	13
2.3 Graphical and Statistical Methods	14
Chapter 3: Preliminary Analysis	18
3.1 Variables of Interest	18
3.2 Age Distribution	19
3.3 Life Tables	29
Chapter 4: Model Life Tables	34
4.1 Models of all 14 provinces for male and female	34

4.2 Models of subgroups of six and eight provinces for male and female	37
Chapter 5: Conclusions and Discussion	45
5.1 Conclusions	45
5.2 Discussion	45
5.3 Limitations and Recommendation for Future Research	47
References	48
Appendix	51
Vitae	59

List of Tables

Table	Page
1.1 The population of Thailand from 1909 to 2000	6
1.2 Life table for males in Pattani province	10
2.1 Life table calculation for males and females in Pattani Province	15
3.1 Variable roles and types in this study	18
3.2 Life table for Southern Thailand (2000) and the US (2002)	29
3.3 Life expectancy for first age group by provinces in Southern Thailand	33
4.1 Model life table for all 14 provinces for males	35
4.2 Model life table for all 14 provinces for females	36
4.3 Model life table for six provinces for males	38
4.4 Model life table for six provinces for females	39
4.5 Model life table for eight provinces for males	40
4.6 Model life table for eight provinces for females	41

List of Figures

Figure	Page
1.1 Southern provinces with percent Muslim	3
1.2 Southern provinces with percent urban	4
1.3 Southern provinces with percent change of population	5
3.1 Age pyramids for Muslim and non-Muslim population for six provinces in Southern Thailand	20
3.2 Age pyramids for Muslim and non-Muslim population for eight provinces in Southern Thailand	21
3.3 Percent of the population in Chumphon province	22
3.4 Percent of the population in Krabi province	22
3.5 Percent of the population in NakhonSiThammarat province	23
3.6 Percent of the population in Narathiwat province	23
3.7 Percent of the population in Pattani province	24
3.8 Percent of the population in Phang-nga province	24
3.9 Percent of the population in Phatthalung province	25
3.10 Percent of the population in Phuket province	25
3.11 Percent of the population in Ranong province	26
3.12 Percent of the population in Satun province	26
3.13 Percent of the population in Songkhla province	27
3.14 Percent of the population in Suratthani province	27
3.15 Percent of the population in Trang province	28
3.16 Percent of the population in Yala province	28

Figure	Page
3.17 Hypothetical cohorts of males who alive at exact age	30
3.18 Hypothetical cohorts of females who alive at exact age	30
3.19 Log base 2 of number dying of males	32
3.20 Log base 2 of number dying of females	32
4.1 Plots of Pearson residuals from logistic regression models fitted to all 14 Southern Thai provinces for males (left) and females (right)	37
4.2 Plots of Pearson residuals from logistic models fitted to groups of six (upper) and eight (lower) Southern Thai provinces for males (left) and females (right)	42
4.3 Age-specific mortality curves based on fitted logistic models	43
4.4 Age-specific mortality curves with the corresponding model curves	44
4.5 Province-specific relative mortality levels based on fitted logistic models	44
