### **Abstract**

The purpose of this research were 1) document the to level of team learning practice of nurse administrators in accredited hospitals under the ministry of Public Health, Southern Thailand, and 2) to identify problems related to team learning practices of nurse administrators. The subjects were selected by simple random sampling. The research instrument was a questionnaire which was tested for content validity and reliability. Cronbach's alpha coefficients for process of team learning and problems related to team learning practices were .95 and .75 respectively. Data were analyzed by descriptive statistics ; frequency, percent, mean and standard deviation.

Results of the study revealed that nurse administrators in accredited hospitals under the Ministry of Public Health had practised the process of team learning at a high level ; and the level of problems regarding team learning practice was at a moderate level.
