

## **5. Scope, Limitation and Assumption of the Study**

1. Students entering the university under special admission programs and whose EEE scores were not available were excluded from the study.
2. The data used in this study were limited to those of the academic year 1999. Care should, therefore, be taken in generalizing the findings of the study to students in other academic years.
3. It was assumed that the EEE and FE achievement tests in the academic year 1999 were valid.
