Lists of Tables

Table		Page
1	Prevalence of integrons and integron component genes in <i>E. coli</i> from pigs and humans with and without exposure to pig farms	8
2	Prevalence of integron-positive and integron-negative <i>E. coli</i> from pigs versus farm size	9
3	Prevalence of integrons and integron component genes in <i>E. coli</i> from retail pork	10
4	Frequency of resistance to 16 antimicrobials in integron-positive <i>E. coli</i> from various swine groups and pig farmers	15
5	Comparison of frequency (%) of resistance to 16 antimicrobials in integron-positive and integron-negative <i>E. coli</i> from swine	16
6	Antibiograms of integron-positive and selected integron-negative <i>E. coli</i> from swine	17-18
7	Antibiograms of integron-positive isolates from diarrheal and healthy pigs and pig farmers on the same farm	19
8	Comparison of frequency (%) of resistance to 15 antimicrobials in integron-positive and integron-negative <i>E. coli</i> from retail pork	20
9	Antibiograms of integron-positive and integron-negative <i>E. coli</i> from retail pork	22

Lists of Figures

Figure		Page
1	MP-PCR detecting class 1 integron gene sequences	5
2	Multiple antimicrobial resistance of integron-positive <i>E. coli</i> isolated from pigs, pig farmers and non-farmers	12
3	Multiple antimicrobial resistance of integron-positive and integron-negative <i>E. coli</i> isolated from retail pork	21
