Abstract	ii
Introduction	1
Materials and Methods	
Materials	4
Methods	
1. Animal breeding and larval care	
<i>1.1 Animal breeding</i>	4
<i>1.2 Animal care</i>	5
2. Thyroid hormone solution preparation	5
3. Animal collection for experimental treatments	
<i>3.1 For the hatching rate study</i>	5
<i>3.2 For the survival rate study</i>	6
<i>3.3 For the enzyme assays</i>	6
<i>3.4 For mRNA assay</i>	7
4. Enzymatic activity assays	
<i>4.1 Protein extraction</i>	7
<i>4.2 Glucose-6-phosphate dehydrogenase (G6PDH) activity assay</i>	7
<i>4.3 Lactate dehydrogenase (LDH) activity assay</i>	8
<i>4.4 Transglutaminase (TG) activity assay</i>	8
5. RNA extraction	8
6. Removal of contaminated DNA with deoxynucleotidase (DNase)	9
7. Synthesis and amplification of specific DNA fragment by two-step reverse transcription and PCR (RT-PCR)	
<i>7.1 Synthesis of first strand complementary DNA (cDNA) by reverse transcription</i>	9
<i>7.2 Specific DNA amplification by polymerase chain reaction (PCR)</i>	10
8. 5' and 3'-RACE	10
9. Isolation and purification of DNA from agarose	10
10. Cloning of DNA fragment	11
11. Purification of plasmids	11

12. DNA sequencing	11
13. Determination of protein concentration	12
14. Statistics	12

Results and Discussion

1. Effect of thyroid hormones on the green catfish hatching rate	
1.1 <i>Effects of the exposure period to T₃ on hatching rate</i>	13
1.2 <i>Effect of T₃ dosage on the hatching rate</i>	13
1.3 <i>The effect of T₄ doses and exposure period on the hatching rate</i>	14
2. The effect of thyroid hormone on green catfish survival	
2.1 <i>Effect of short-term treatment of T₃ on the survival profile of the larvae</i>	15
2.2 <i>Effect of long-term treatment of T₃ on the survival rate of the catfish larvae</i>	16
3. The effect of thyroid hormone on metabolism of the green catfish	
3.1 <i>Effect of T₃ on G6PDH</i>	17
3.2 <i>Effect of T₃ on LDH</i>	20
3.3 <i>Effect of T₃ on TG</i>	21
4. Effect of thyroid hormone regulation on the level of mRNAs	
4.1 <i>Isolation of alpha thyroid hormone receptor (TRα), G6PDH, TG, and deiodinase III cDNA fragments of the green catfish</i>	24
4.2 <i>The gene expression of TRα during growth of the green catfish larvae</i>	24
4.3 <i>Changes in the expression level of the TRα, G6PDH, TG and deiodinase III during actions of thyroid hormone</i>	25
