

## **Objectives**

The objectives of this study are as the following:

1. To find out the knowledge, attitudes and practice of the university students in Songkla province on sexual behavior, contraception, and STD prevention including AIDS, as well as reproductive health problems.
2. To present the results of this study to the universities, authorities, and the responsible agencies or organizations, aiming that they will accept the certain needs of these adolescents and setting up a unit in the university for these adolescents' problems.
3. To collect fundamental data for the working of peer counsellors to arrange the sequence of topics of talks or exhibitions in their university, and also for a further specific study of the needs and other related problems of the adolescents.
