Abstract	iii
Acknowledgments	vi
Contents	vii
List of Tables	ix
List of Figures	x
Chapter 1: Introduction	1
1.1 Background	1
1.2 Objective	3
1.3 Definitions of Terms	4
1.4 Concept and Theory of Thai Traditional Massage	5
1.5 Literature Review	7
Chapter 2: Methodology	10
2.1 Study Design	10
2.2 Variables	11
2.3 Data Collection, Management and Data Analysis	12
2.4 Graphical and Statistical Methods	13
Chapter 3: Data Analysis	17
3.1 Descriptions of the Variables	17
3.2 Frequency Distributions of the Determinants	18
3.3 Distributions of Outcome Variables	23
3.4 Associations between Total Cost and Determinants	24
3.5 Associations between Number of Visits and Determinants	26

3.6 Multiple Regression Model	29
Chapter 4: Interviews	31
4.1 Interviews with patients	31
4.2 Interviews with staff members	36
Chapter 5: Conclusions and Discussion	40
5.1 Conclusions from Quantitative Study	41
5.2 Conclusions from Qualitative Study	42
5.3 Discussion	43
5.4 Limitations	44
5.5 Recommendation for further research	45
References	46
Appendix A	49
Appendix B	51
Vitae	52

List of Tables

Table	Page
3.1 Variables and their roles and data types	18
4.1 Characteristics of six patients interviewed	31
4.2 Demographic characteristics of staff members interviewed	36

List of Figures

Figure	Page
2.1 Putative relationships between the variables.	11
3.1 Frequency distributions of demographic determinants	19
3.2 Frequency distribution of place of residence, grouped by tumbon (subdistrict), amphur (district) and province	19
3.3 Frequency distributions of socio-economic characteristics	20
3.4 Frequency distributions of Health Problems	21
3.5 Frequency distributions of continuous determinant	21
3.6 Frequency distributions of treatment component costs	23
3.7 Frequency distributions of total cost and total cost log	23
3.8 Frequency distribution of number of visits	24
3.9 Comparison between Total Cost Log and age group	24
3.10 Comparison between Total Cost Log and occupation	25
3.11 Comparison between total cost and card type	26
3.12 Association between number of visits group and sex	26
3.13 Association between number of visits group and age	27
3.14 Association between number of visits group and religion	27
3.15 Association between number of visits group and tumbon	28
3.16 Association between number of visits group and occupation	28
3.17 Association between number of visits group and card type	29
3.18 Multiple regression model for total cost: three predictors	30
3.19 Multiple regression model for total cost: two predictors	30
