Contents	(8)
List of Tables	(10)
List of Illustrations	(11)
CHAPTER	
1. INTRODUCTION	
Introduction	2
Determinants of Educational Attainment	3
Rationale	6
Research Questions	7
2. METHODOLOGY	
Study Design	8
Population and Sample	8
Variables	10
Data Collection and Data Management	12
Statistical Methods	12
Graphical Method	15
3. PRELIMINARY DATA ANALYSIS	
Distributions of Variables	16
Associations between the Outcome and Each Determinant	21
4. MULTIPLE REGRESSION ANALYSIS	
Regression analysis	29

5. CONCLUSIONS AND DISCUSSION	
Conclusions	41
Discussion	42
Limitations	44
Application	44
BIBLIOGRAPHY	45
APPENDIX	47
VITAE	67

LIST OF TABLES

Table	Page
1. Subjects excluded	9
2. Subject selected	9
3. Categories of each variable	11
4. Distribution of students by determinant variables	20
5. Number of subjects classified by age group	21
6. P-values for the univariate associations	22
7. The Coefficients of gender and age group	37
8. Mean achievement score for males of the Faculty of Science and Technology	38
9. Mean achievement score for females of the Faculty of Science and Technology	38
10. Univariate analysis of determinants for achievement	41

LIST OF ILLUSTRATIONS

Figure	Page
1. Histograms and numerical summaries means of data used	18
2. Histograms of outcome variable before and after log transformation	18
3. Box plots of achievement by gender, and age group	23
4. Box plots of achievement by residence, and family status	24
5. Box plots of achievement by university enrollment	25
6. Box plots of achievement by educational background	26
7. Achievement versus school GPA by age group & gender (male=1, female =2)	27
8. <i>Achievement</i> versus school GPA by method of entrance & type of school (formal=0, nonformal=1)	28
9. Full model of multiple regression analysis	30
10. Multiple regression analysis of 627 Pattani undergraduates in academic year 1993	31
11. Model for achievement with family status recoded	32
12. Model with gender omitted	33
13. Model with main effect and interaction	34
14. Model with all combinations of gender and age group	35
15. Histograms and numerical summaries of predicted data	39
16. The predictive data adjusted by age group and gender	39
17. The predictive data adjusted by faculty and gender	40
18. Plot of actual score against predicted score	40
19. Means of achievement by age group and gender	43
