Abstract	5
Acknowledgments	9
Contents	10
List of Tables	12
List of Figures	13
Chapter	
1. Introduction	
1.1 Background	14
1.2 Literature reviews	15
1.3 Objectives	19
1.4 Expected advantages	19
2. Methodology	
2.1 Study design and data sources	21
2.2 Data management	21
2.3 Path diagram and variables	22
2.4 Statistical Methods	23
3. Preliminary Data Analysis	
3.1 Description of the variables	29
3.2 Distribution of determinants	30
3.3 Ill-defined death rates of each determinant	33

	Page
4. Statistical Modeling	
4.1 Statistical models	37
4.2 Confidence interval	43
5. Discussion and Conclusion	
5.1 Summary of findings	48
5.2 Discussion	49
5.3 Suggestions and future research	51
References	52
Appendix	59
Vitae	68

## List of Tables

Tables	Page
Table 3.1: Variable categories	30
Table 3.2: Distribution for ill-defined deaths in each year	30
Table 3.3: Frequency distribution of ill-defined deaths separated by determinants	31
Table 4.1: Coefficients, standard errors and p-values of ill-defined mortality rate in Thailand from negative binomial regression model	41

## List of figures

Figures	Page
Figure 2.1: Path diagram of the study	23
Figure 3.1: Annual ill-defined death rates by year and gender	33
Figure 3.2: Trends of ill-defined death rates by age group and year	34
Figure 3.3: Annual Ill-defined death rates by place of death and year	35
Figure 3.4: Trends of annual ill-defined death rates by region	36
Figure 4.1: Residuals plot for log linear model (left panel), Poisson model (right panel), and negative binomial model (bottom panel)	39
Figure 4.2: Plot of observed counts (left panel) and observed death rate (right panel) against fitted values from negative binomial model	40
Figure 4.3: 95% Confidence interval plot for region gender-age group and year of ill-defined death rates per 100,000 population during the period 2000-2009	43
Figure 4.4: Bar chart of ill-defined death rates per 100,000 population	45
Figure 4.5: Schematic maps of ill-defined death rate for each province	46
