List of Tables

Table		Page
2.1	Some parameters from five peat swamps along Mai-Khao coast on Phuket Island, measuring during sampling period from November 1999 to February 2001	22
3.1.1	Sampling durations and number of sites and samples of five coastal peat swamps on Phuket Island	28
3.1.2	List of rotifer fauna from five coastal peat swamps in Phuket province, southern Thailand	30
3.1.3	Distribution of rotifers in genera *Brachionus*, *Lecane* and *Trichocerca* of the five coastal peat swamps	35
3.2.1	Used names, formulae, references and codes of estimate indices	61
3.2.2	Used names, formulae, references and codes of complementarity and diversity indices	62
3.2.3	Estimated total species richness based on 14 and 28 samples from the Jae-Son data for five estimators	67
3.2.4	Total species richness from observation, calculated species richness from 50 randomization species accumulation curve and expected species richness from Chao2 estimator of five peat swamps	70

List of Tables (continued)

Table		Page
3.2.5	Richness (S_{obs}) and percentage complementarity of rotifer fauna among the five coastal peat swamps along Mai-Khao beach on Phuket island	71
3.2.6	Three commonly used diversity indices calculated for the five peat swamps.	73
3.3.1	Axis summary statistics for CCA analysis of the five peat swamps	92
3.3.2	Inter-set correlation for 11 variables of the CCA analysis in the five peat swamps	93
3.3.3	Monte Carlo Test results of eigenvalues and species - environment correlations of the five peat swamps	98
3.3.4	Axis summary statistics for CCA analysis of the three peat swamps	100
3.3.5	Inter-set correlation for 11 variables of the CCA in the three peat swamps	101
3.3.6	Monte Carlo Test results of eigenvalues and species-environment correlations of the three peat swamps	108

List of Tables (continued)

Table		Page
3.4.1	Repeated measurement analysis of the short- and long-term effect of exposure conditions and durations on the number of species hatching	125
3.4.2	Rotifer species hatching from the sediment exposure in different conditions	125
3.4.3	Repeated measurement analysis of the short- and long-term effect of exposure conditions and durations on the number of rotifer hatching	127

List of Figures

Figure		Page
1.1	Rotifer anatomy	5
1.2	Some major types of trophi	6
1.3	The life cycle of monogonont rotifers	7
2.1	Map of Thailand showing the location of five coastal peat swamps along Mai-Khao beach on Phuket Island, southern Thailand	15
2.2	The amount of precipitation of Ta-lang district during 1995-2000	16
2.3	Coastal peat swamp areas along Mai-Khao beach in Phuket province, southern Thailand	17
3.1.1	Map of Thailand showing the location of five coastal peat swamps in Phuket province	28
3.1.2	Percentages of the rotifer composition of five coastal peat swamps along Mai-Khao coast in Phuket province	32
3.1.3	Proportional occurrence of distribution patterns in genus *Brachionus*, *Lecane* and *Trichocerca*	38
3.1.4	*Colurella psammophila* Segers and Chittapun, 2001	40
3.1.5	*Colurella sanoamuangae* Chittapun, Phonpunthin and Segers, 1999	41

List of Figures (continued)

Figure		Page
3.1.6	Ventral view of *Dicranophoroides* sp. trophi	42
3.1.7	*Encentrum pornsilpi* Segers and Chittapun, 2001	44
3.1.8	*Lepadella desmeti* Segers and Chittapun, 2001	46
3.1.9	Microscopic pictures of rotifers	48
3.2.1	(a) Observed species accumulation curves (±1SD) of the five areas; (b) Observed species accumulation curves (±1SD) of the percent of total sampling effort from five coastal peat swamps	66
3.2.2	Performance of five non-parametric estimators of species richness for Jae-Son peat swamp	68
3.3.1	Cluster analysis based on rotifer communities of five coastal peat swamps in Phuket province	88
3.3.2	DCA ordination of rotifer community of monthly samples from five coastal peat swamps	90
3.3.3	The CCA ordination of samples and important variables of the five peat swamps	94
3.3.4	The CCA ordination of rotifer species and important variables of the five peat swamps	97
3.3.5	The CCA ordination of samples and important variables of the three peat swamps	103

List of Figures (continued)

Figure	Page
3.3.6 The CCA ordination of rotifer species and important variables of the three peat swamps	106
3.3.7 TWINSPAN analysis on rotifer communities from five peat swamps	112
3.4.1 Map of Thailand showing the location of Mai-Khao peat swamps on Phuket Island, southern Thailand	121
3.4.2 (a) The sediment stored in AD and AL conditions and placed under clear roof in culture laboratory building; (b) The sediment placed in Jermaks incubation	122
3.4.3 Process of study recreates capability of rotifer population	123
3.4.4 The number of species hatching from different exposure condition and duration	126
3.4.5 The number of specimens hatching of all species	128
3.4.6 Percent hatching of three commonest species for three months	130
3.4.7 Number of *Lecane obtusa* and *L. bulla* hatching from sediment, which expose under in different conditions and duration	132

List of Abbreviations

al	=	alula
c.	=	calculated
°C	=	degree Celsius
CCA	=	Canonical Correspondence Analysis
cm	=	centimeter
d	=	Berger-Parker dominance index
D	=	Simpson diversity index
DCA	=	Detrend Correspondence Analysis
DO	=	Dissolved Oxygen
E	=	Simpson's equitability
et al.	=	Et. Ali (Latin), and others
fu	=	fulcrum
g	=	gram
H	=	Shannon Wiener index
J	=	Shannon Wiener' equitability
kg	=	kilogram
km^2	=	square kilometer
µm	=	micrometer
m^2	=	square meter
ma	=	manubrium

List of Abbreviations (continued)

$mg.l^{-1}$	=	milligram per liter
$mS.cm^{-1}$	=	milli Siemens per centimeter
NTUs	=	Nephelometric Turbidity Units
OECD	=	Organization for Economic Co-operation and Development
p.	=	page
ppt	=	part per thousand
ra	=	ramus
SPSS	=	Statistical Package for Social Science
TWINSPAN	=	Two-Way Indicator Species Analysis
un	=	uncus
